Keyword Research & Strategy

Thrive is an SEO agency that understands your niche and can boost your ranking for specific search terms. Your dedicated SEO specialist will review the keywords your website is currently ranking for, take your keyword wishlist and conduct additional keyword research to build a list that makes the most sense for your website and the competitive landscape.

Link Building

Backlinks are a huge component of ranking higher in search results, but not just any link! That's why you should partner with a search optimization company that has a dedicated link building team and an extensive network of trusted websites. Our digital marketing SEO agency implements white-hat link building tactics to ensure your long-term SEO success.

Technical SEO

Rankings can improve with optimizations on your website's back end, such as improving page speed. Fixing these errors makes it easier for search engines to crawl your website, increasing your chances of climbing the search results. Our technical SEO services include comprehensive site audits and on-site optimization that power your organic growth engine.

Local SEO

Key SEO Market Growth Indicators

Here's a quick snapshot of the stats that show just how healthy the SEO market really is. These numbers paint a clear picture of opportunity for anyone ready to jump in.

Metric	Value/Projection
Global Market Size	Projected to grow from \$74.9 billion in 2025 to \$127.3 billion by 2030.
On-Page SEO Share	Accounts for a massive 42.3% of the entire SEO services market.
Driving Factors	Fueled by the explosion in mobile search and rising digital ad spend.

This isn't a market that's slowing down. It's an expanding universe, and there are more than enough stars for everyone. You can dig into these market trends yourself to see the full scope.

Also, Our team great at

Specialization = Higher Margins + Easier Sales

Start by understanding where the demand is growing and what businesses are willing to pay for. The most profitable SEO services today include:

- **Technical SEO audits** for websites migrating to headless CMS or SPAs (React, Vue, etc.)
- **Content strategy and topical authority building**, especially for B2B SaaS and fintech niches
- **E-E-A-T optimization** for YMYL niches like healthcare, law, and finance
- **Local SEO + Google Business Profile optimization** for service-area businesses
- **Programmatic SEO** for content-heavy projects (directories, marketplaces, listings)
- **AI-content cleanup and validation** – many businesses tried AI tools like ChatGPT and now need SEO pros to fix the results

Our Engagement Models

As one of the most reputable mobile application development company in India, AAPNA offers a range of engagement models to offer maximum flexibility to our clients. We offer-

Fixed Cost

The fixed-cost projects have a fixed budget and timeline. Therefore, it is ideal for small to medium-sized projects with fixed requirements where no changes are to be made to the project's scope.

- Transparency and predictability
- Precise end-goal
- Requires less supervision and management from the clients
- Ideal for short to medium-term projects and MVPs

T&M (Time & Material)

Projects with dynamic or undefined scopes, or complex requirements, are best suited for our T&M model, where developers are hired based on their time.

- Highly flexible
- Effectively utilizes the agile methodology
- Higher degree of project control
- Ideal for projects with dynamic or undefined scope requirements

Dedicated Resources

The model provides clients with access to a dedicated IT team that entirely focuses on the client's needs. The team includes Software Engineers, QA Engineers, Project Managers, and other roles required for the project.

- Transparent pricing with monthly billing
- Tighter security standards
- Predictable budget
- Ideal for MVPs, startups, and product/software companies

About This Calculator

How is close rate determined?

Leads come from various sources. A referral lead may close at 50% but they will only make up a small percentage of your leads. We estimate an industry average of 2.5% based on a mix of paid, free, and referral sources.

How are leads by source determined?

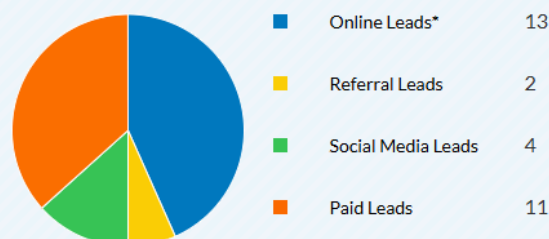

The mix of leads by source are based on an informal survey of top producing real estate agents
